

cordin8 Change Management Solution is an ideal system for managing small project requests.

The Change Management Solution is designed to help organizations manage small project requests, typically less than 250 hours of direct effort. It is easily configurable for your specific business requirements and reporting needs. It can also be integrated with your other internal systems.

Product Features

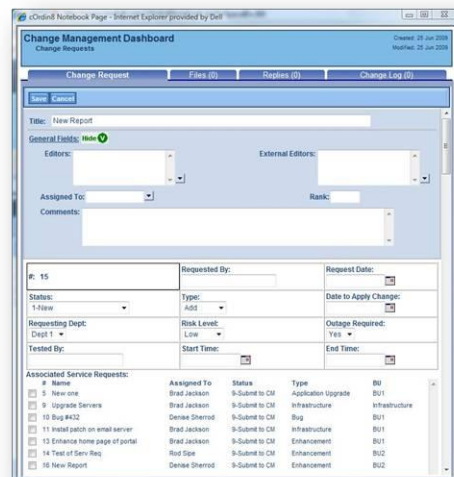

Service Request Dashboard

The Dashboard provides views and reports on the status of requests: new, in process, on-hold, and complete. Views and reports enable group and organizational level reporting.

Service Request Form

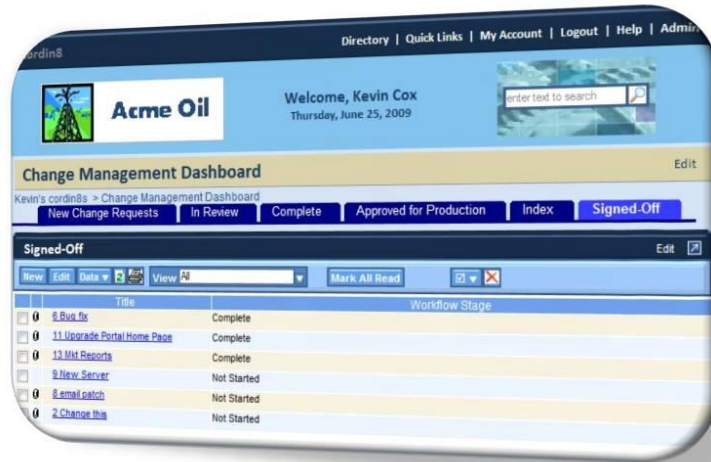

The Service Request Form captures all relevant information from the requestor. The request can be assigned to one or more team members for tracking and reporting and processed via a pre-defined workflow routing. The request form also enables stakeholders to attach files, post comments, and track changes for the request as it is processed.

cordin8 Change Management Solution

Implementation Approval

Utilize the solution to capture and store approvals and to manage the implementation of changes, including any recovery procedures required.
